

## ODORLESS SILICONE SOLVENT™ SAM OSS

The Silicone Fluid that evaporates 100% at room temperature.

Odorless Solvent for liquid Silicone Rubber and Silicone Caulking.  
Thins silicone to painting and airbrushing consistency.  
Great for silicone cleanup.

Evaporates slightly slower than water at a rate comparable to naphtha solvents and odorless mineral spirits.

**California VOC Exempt and will not contribute to ozone depletion or global warming.**

**Clear and odorless, SAM OSS evaporates 100% at room temperature.**

**Widely used in cosmetics, personal care products and green dry cleaning,  
Cyclopentasiloxanes are estimated to be safely used by 200 million people daily.**

### **SAM OSS Odorless Silicone Solvent:**

- is flammable but NOT considered a shipping hazard
- is considered safe to use
- will not contribute to ozone depletion or global warming
- dries slightly slower than water
- has traits of more aggressive solvents yet does not dissolve plastics
- has 'slip' when wet
- remains fluid at freezing temperature (32°F/0°C)
- has no smell or chemical odor

### **OTHER USES:**

Smooth oil-based clay and clean clay off tools.  
Clean makeup brushes.  
Clean wet oil paint from brushes.  
Clean synthetic and natural hair wigs, beards and fake fur.  
Help comb out knots and tangles from wigs, beards and fake fur.  
Good degreaser. Cut through oil, grease and soft wax.  
Dissolve silicone pressure sensitive adhesive.  
Good 'spot' dry cleaning fluid. Will not harm fabrics.  
Good lubricant when sanding rubbers and soft plastics.

**For Professional Use Only.** Use with adequate ventilation.  
Do not expose to flame, ignition sources or heated surfaces.  
Flash Point 170.6°F / 77°C. Boiling Point 210°C / 410°F. Freezing Point -40°C / -40°F.  
Can be Shipped without any D.O.T. "hazardous materials handling" requirements.  
See MSDS - Material Safety Data Sheet.  
Contains Cyclopentasiloxane (CAS# 541-02-6).
